

Effort File

Khoi Duong

Group: Nihal Ernest, Ryan Trinh, Reza Pasha, Luqman Rashad

I work on the data input with Nihal and Reza. Nihal created an excel sheet and started to make our own data file from multiple sources. Reza and I work on data input with Nihal from the Formula 1 website, <https://www.formula1.com/en/results.html/2019/drivers.html>. Each of us input the proper standing and points of each year for each driver in the spreadsheet.

Nihal, Luqman, and Ryan helped with the making of the visualization in the .js file. They work on the line chart and scatterplot, and importing data to both charts. Luqman and Nihal mainly works on the scatterplot, and Ryan works on the linechart. They make sure that we have a product for visualization of F1 data. I and Reza work on bug and quality control of their work, such as making sure the charts output or alignments are correct.
